

## Release WF 30

(Provisional)

### Description

RELEASE WF 30 is a water borne release agent, developed to provide a controlled release effect on particular substrates.

### Application

RELEASE WF 30 is used as a release agent on fabrics and non wovens for various application, like technical tapes.

### Technical Specifications

Method of analysis	MU	Standard
1. Total Solids	%	30±1
3. Brookfield Viscosity 25°C	mPa.s	20 - 70 <sup>(1)</sup>
8. pH	pH	3 - 5
- Solvents		water

<sup>(1)</sup> No 1 RV; 100 RPM

stir the product for 10 - 15 minutes before use.

Use within 6 months from the date of manufacture (unopened and in the original packaging).

### Handling

RELEASE WF 30 can be applied directly on the substrate, with reverse roll or knife. The product must be diluted with water (to a final concentration: 3-5%, depending on the desired release effect).

### Packing

The product is supplied in iron drums (200 kg); IBC containers (1000 kg).

### Storing

Keep material at temperatures between +5°C and +35°C, avoid freezing temperatures. When stored for over one month, it is necessary to
